Square Setup Guide for Diamond Platinum Cleaning

Nov 9, 2026 · @Charles

Follow these six steps to open your Square account, create the three payment links your website needs, and start invoicing clients. Plan on about 45 minutes, plus a few business days for Square to verify you.

Before you start

Have these ready at your computer:

- [ ] A government photo ID (driver's license or state ID)
- [ ] Your EIN, if Diamond Platinum Cleaning is an LLC, or your Social Security number if you are a sole proprietor
- [ ] Your business bank account and routing numbers (a US account that accepts ACH deposits)
- [ ] The email info@diamondcleaningp.com and access to that inbox
- [ ] The business phone (313) 750-6159
- [ ] Your DPC logo image file

Keep your information safe:

- Type passwords, your SSN and bank numbers only on squareup.com. Check that the address bar reads squareup.com before you enter anything.
- Never send passwords, your SSN or bank numbers to Claude or anyone else. The only thing Claude needs from you is the three payment links you create in Step 4.
- Turn on 2-step verification when Square offers it.

Step 1: Create your Square account

Sign up at squareup.com with your business email so receipts and alerts reach the business inbox.

1. Go to **squareup.com** and click **Get started**.
2. Enter **info@diamondcleaningp.com** and create a strong password you have not used anywhere else.

3. Enter your business name: **Diamond Platinum Cleaning**.
4. Choose your business type. Pick **Home and repair services** or **Cleaning** if listed; otherwise the closest service category.
5. Choose how the business is set up:
   - **LLC:** select the LLC or registered business option and enter your **EIN**. Your business plan recommends forming an LLC before launch.
   - **Sole proprietor:** select **Sole proprietor** or **Individual** and use your **SSN**. You can add an EIN later under Account & Settings, then Business, then Tax forms.
6. Enter your legal name, home or business address, and phone number. Use the same legal name that is on your ID and bank account.
7. When Square asks how you will take payments, choose **online** or **invoices**. You do not need a card reader to start.
8. Open the confirmation email Square sends to info@diamondcleaningp.com and click the link to confirm your email.

Screen names change often, so the labels you see may differ slightly. Sole proprietors can sign up with an SSN, and Square recommends an EIN for registered businesses (Wise, Square help: sole proprietors, Merchant Maverick).

Step 2: Verify your identity and link your bank account

Square must confirm who you are before it can send you money, and this usually takes a few business days.

Verify your identity

1. In your Square Dashboard, follow the prompt to **Verify your identity**, or look under **Account & Settings**.
2. Enter your legal name, date of birth, address and SSN or EIN exactly as they appear on your official records.
3. If Square asks for a photo of your ID, upload a clear photo with all four corners showing.

Link your bank account

1. Go to **Account & Settings**, then **Bank accounts** (or **Balance**, then **Transfer to bank**).
2. Enter your business bank's routing number and account number. Type them carefully; one wrong digit sends deposits to the wrong place.

3. Square may send a small test deposit to confirm the account. Check your bank in 1 to 2 business days and confirm the amount in Square if asked.

Use a business account, not a personal one, so business income stays separate for taxes. Square requires a US bank account that accepts ACH deposits (Gentle Frog Bookkeeping, LitCommerce).

Step 3: Add your business details and logo

Branding your account makes every invoice, receipt and checkout page look like Diamond Platinum Cleaning, which builds trust when clients pay.

Go to **Account & Settings**, then **Business information** (or **Business**, then **Locations**), and enter:

Field	What to enter
Business name	Diamond Platinum Cleaning
Phone	(313) 750-6159
Email	info@diamondcleaningp.com
Website	https://diamondplatinumcleaning.com
Logo	Your DPC logo image
Business description	Checklist-driven move-out, deep and recurring cleaning for Metro Detroit

Then check **Account & Settings**, then **Receipts** (or **Invoices**, then **Settings**) and confirm your logo and contact details appear on receipts and invoices.

Step 4: Create your three payment links

A payment link is a secure Square checkout page. Your website's Pay page already has three buttons waiting for these links.

For each link: go to **Payments & orders**, then **Payment links** (in some dashboards it is under **Online**, then **Checkout links**), click **Create link**, and choose **Collect a payment**.

Link	Title to type	Amount
1	Booking Deposit – Standard, Deep or Listing Prep	Fixed: $50.00
2	Booking Deposit – Move-In/Move-Out or Turnover	Fixed: $100.00
3	Pay Your Invoice	Customer enters the amount

For links 1 and 2: type the title, enter the amount, and add this description: "Holds your appointment. Applied in full to your final invoice. See diamondplatinumcleaning.com/cancellation.html for refund terms." Click **Create link**.

For link 3: type the title, then open **Advanced settings** (or **Checkout options**) and turn on the option that lets the customer set the price. In the description, write "Please enter the amount on your invoice and include your invoice number." If Square offers a custom field or note for the buyer, add one labeled "Invoice number." Click **Create link**.

After each one, click **Copy link** and paste it into a note on your phone or computer. You will send all three to Claude in Step 5.

Tip: Open each link yourself before sharing it to confirm the title, amount and logo look right. You do not need to pay to preview it.

Step 5: Send the three links to Claude

Each link will look something like **square.link/u/AbC123xy**. Paste all three into the chat, labeled like this:

- $50 deposit: (link)
- $100 deposit: (link)
- Pay your invoice: (link)

Claude will connect them to the buttons on your Pay page, test them, and publish the update. Netlify puts the change live on diamondplatinumcleaning.com within a minute or two.

Security reminder: payment links are safe to share because they only let people pay you. Never send your Square password, bank account number, routing number or Social Security number in a chat, text or email.

Step 6: Invoice clients after each job

The deposit holds the appointment. After the cleaning, you bill the balance.

1. Go to **Invoices**, then **Create invoice**.
2. Add the customer (name, email and phone).
3. Add the service as a line item at the full price, for example "Move-Out Clean, 3 bed / 2 bath – $325."
4. Add a second line item called "Deposit paid" as a negative amount (for example, –$100), or a discount for the same amount, so the balance due is correct.
5. Set the due date (due on receipt is common), then click **Send**. The client gets an email with a Pay button.

Alternative for larger jobs: instead of a separate deposit link, you can use one invoice with **Add Payment Schedule**, then **Request Deposit**, and set a dollar amount or percentage. Square notes that payment schedules are not available when bank transfer (ACH) payment is turned on for that invoice, so turn ACH off first if you use this option.

Reminders: in the invoice settings, turn on automatic reminders (for example, on the due date and 3 days after).

Refunds: under your cancellation policy, clients who cancel with at least 24 hours' notice (48 hours for move-outs and property-manager turnovers) get the deposit back. To refund, go to **Transactions**, open the payment, and click **Issue refund**. Square's processing fee on the original payment is generally not returned to you.

Fees at a glance

Approximate rates from published comparisons; confirm on Square's own pricing page before you set prices, since rates change.

How the client pays	Approximate fee	On a $100 deposit
Payment link or invoice, free plan	3.3% + 30¢	about $3.60
Payment link or invoice, paid plan	2.9% + 30¢	about $3.20
In person (tap or card reader)	2.6% + 15¢	about $2.75

Square's free plan has no monthly fee. Deposits usually reach your bank in 1 to 2 business days.

If something goes wrong

Problem	What to do
Square asks for more documents	Upload exactly what it requests (usually a photo ID). Approval can take a few business days.
Test deposits never arrived	Wait 2 to 3 business days, then confirm the routing and account numbers in **Banking**.
No "customer sets the price" option	Look under **Advanced settings** or **Checkout options**, or contact Square Support. You can use invoices only in the meantime.
Payment Schedule button is missing	Turn off bank transfer (ACH) for that invoice.
A client says the Pay button does not work	Send Claude a screenshot; meanwhile, send that client an invoice directly from Square.

Printable checklist

- [ ] Square account created with info@diamondcleaningp.com
- [ ] Identity verified
- [ ] Bank account linked and test deposits confirmed
- [ ] Logo, phone, email and website added
- [ ] $50 deposit link created and copied
- [ ] $100 deposit link created and copied
- [ ] Pay Your Invoice link created and copied
- [ ] All three links previewed
- [ ] Links sent to Claude
- [ ] Pay page buttons tested on the live site
- [ ] First real invoice sent
- [ ] Refund steps practiced once
- [ ] Deposit, cancellation and privacy terms reviewed by an attorney
